

GeometryBasedStarters4Qs: key vocabulary

angle	the amount of turn between two straight lines that meet at a point
division	the operation of splitting a number into equal parts.
intersect	to cross each other
multiply	to add a number to itself a given number of times
ray	a straight line that starts at one point and goes on forever in one direction
sum	the answer when numbers are added together
value	the number that a letter or symbol stands for
vertically opposite	describing two angles, the same size, formed across from each other when two lines cross

GeometryBasedStarters4Qs: key vocabulary

angle	the amount of turn between two straight lines that meet at a point
division	the operation of splitting a number into equal parts.
intersect	to cross each other
multiply	to add a number to itself a given number of times
