

ExpandingBracketsStarter: key vocabulary

area	the amount of space inside a flat shape
Arithmetic	the branch of mathematics that deals with adding, subtracting, multiplying and dividing numbers.
Box Method	a way of multiplying or expanding by splitting a rectangle into smaller parts.
bracket	one of a pair of curved symbols, (), used to group numbers or letters.
constant	a fixed number that stands alone, like 3 in $3x+3$.
distributive property	the rule that $a(b+c)=ab+ac$.
expand	to multiply out brackets so the expression has no brackets left
like terms	terms that have the same letter or letters, or no letter, so they can be added or subtracted together.
rectangle	a flat shape with four straight sides and four square corners.
terms	one part of an expression or one number in a sequence
