

ExpandingDoubleBracketsStarter: key vocabulary

area	the amount of space inside a flat shape
brackets	A pair of signs used in mathematics to group together a part of an expression.
expand	to multiply out brackets so the expression has no brackets left
expression	a group of numbers and letters joined by operations, with no equals sign
multiply	to add a number to itself a given number of times
rectangle	a flat shape with four straight sides and four square corners.
simplify	to write something in its smallest or plainest form without changing its value
term	one part of an expression or one number in a sequence

Match the word to its meaning: answers

area		a group of numbers and letters joined by operations, with no equals sign
brackets		the amount of space inside a flat shape
expand		to add a number to itself a given number of times
expression		to write something in its smallest or plainest form without changing its value
multiply		one part of an expression or one number in a sequence
rectangle		A pair of signs used in mathematics to group together a part of an expression.
simplify		to multiply out brackets so the expression has no brackets left
term		a flat shape with four straight sides and four square corners.

Match the word to its meaning: answers

area		a group of numbers and letters joined by operations, with no equals sign
brackets		the amount of space inside a flat shape
expand		to add a number to itself a given number of times
expression		to write something in its smallest or plainest form without changing its value
multiply		one part of an expression or one number in a sequence
rectangle		A pair of signs used in mathematics to group together a part of an expression.
simplify		to multiply out brackets so the expression has no brackets left
term		a flat shape with four straight sides and four square corners.
