

Averages: Mean & Median

Starter

Q7: balance these

Q8: balance these

1. $12 \div 4 = ?$

2. $18 \div 3 = ?$

3. $15 \div 3 = ?$

4. $28 \div 4 = ?$

5. Four friends share 20 sweets equally. How many do they each get?
6. Three children have 2, 5 and 8 stickers. They combine them and share them equally. How many does each child get?
7. Draw a picture of the top towers (left), balanced to the same height without changing the total number of bricks.
8. Draw a picture of the bottom towers (left), balanced to the same height without changing the total number of bricks.

Starter

Q7: balance these

Q8: balance these

- $12 \div 4 = 3$
- $18 \div 3 = 6$
- $15 \div 3 = 5$
- $28 \div 4 = 7$
- Four friends share 20 sweets equally. How many do they each get? **5 sweets**
- Three children have 2, 5 and 8 stickers. They combine them and share them equally. How many does each child get? **5 stickers**
- Draw a picture of the top towers (left), balanced to the same height without changing the total number of bricks.
- Draw a picture of the bottom towers (left), balanced to the same height without changing the total number of bricks.

Q7: balance these

Q8: balance these?

1. $7 \times 8 = ?$
2. $63 \div 7 = ?$
3. $48 \div 8 = ?$
4. $5 \times 9 = ?$
5. Five children have 4, 7, 3, 6, 5 marbles. Shared equally, how many each?
6. Six friends earn £8, £14, £10, £6, £12, £10 at a car wash. Split fairly — how much each?
7. Eight runners finish in 54, 48, 61, 57, 50, 63, 55, 52 s. Without doing any calculations, estimate the average time.
8. What heights would the top towers balance out to?
9. What heights would the bottom towers balance out to?

Starter

Q7: balance these

Q8: balance these?

- $7 \times 8 = 56$
- $63 \div 7 = 9$
- $48 \div 8 = 6$
- $5 \times 9 = 45$
- Five children have 4, 7, 3, 6, 5 marbles. Shared equally, how many each? **5 marbles**
- Six friends earn £8, £14, £10, £6, £12, £10 at a car wash. Split fairly — how much each? **£10 each**
- Eight runners finish in 54, 48, 61, 57, 50, 63, 55, 52 s. Without doing any calculations, estimate the average time. **about 55 s**
- What heights would the top towers balance out to? **5 bricks high**
- What heights would the bottom towers balance out to? **4 bricks high**

Starter

1. $3 + 4 + 7 = ?$
2. $15 + 27 + 18 = ?$
3. $60 \div 4 = ?$
4. $-15 \div 3 = ?$
5. What is the mean of: 4, 6, 2, 8
6. What is the mean of: 3, 9, 5, 7, 1
7. What is the mean of: -3, 5, -1, 7, 2
8. What is the mean of: -8, -2, -5, -1, -4
9. The mean of four numbers is 9. Three are 6, 11 and 8. Find the fourth.
10. The mean of 3, 7, x , 10 is 8. What is x ?

Starter

1. $3 + 4 + 7 = 14$
2. $15 + 27 + 18 = 60$
3. $60 \div 4 = 15$
4. $-15 \div 3 = -5$
5. What is the mean of: 4, 6, 2, 8 **5**
6. What is the mean of: 3, 9, 5, 7, 1 **5**
7. What is the mean of: -3, 5, -1, 7, 2 **2**
8. What is the mean of: -8, -2, -5, -1, -4 **-4**
9. The mean of four numbers is 9. Three are 6, 11 and 8. Find the fourth.
11
10. The mean of 3, 7, x , 10 is 8. What is x ? **12**

Starter 4

- $4 + 2 + 10 = ?$
- $-4 + 9 = ?$
- $-3 - 5 = ?$
- $6 \times 4 = ?$
- Order smallest to largest: 8, 3, 11, 5, 7. Which is the middle value?
- Order: 21, 14, 9, 35, 17, 28, 6. Which is the middle value?
- For 3, 7, 8, 9, 41: *estimate* whether the middle value is above or below the mean. Then check.
- What is the middle value of:
-7, -2, -5, 1, -1, 3, -3
- What is the middle value of: $\frac{1}{2}$, $\frac{1}{4}$, $\frac{3}{4}$, $\frac{1}{8}$, $\frac{5}{8}$
- House prices on a road are: £130k, £125k, £140k, £128k, £135k, £980k.
Why might the mean not be helpful?

Starter 4

- $4 + 2 + 10 = 16$
- $-4 + 9 = 5$
- $-3 - 5 = -8$
- $6 \times 4 = 24$
- Order smallest to largest: 8, 3, 11, 5, 7. Which is the middle value? 7
- Order: 21, 14, 9, 35, 17, 28, 6. Which is the middle value? 17
- For 3, 7, 8, 9, 41: *estimate* whether the middle value is above or below the mean. Then check.
below: median 8, mean 13.6
- What is the middle value of:
-7, -2, -5, 1, -1, 3, -3 -2
- What is the middle value of: $\frac{1}{2}$, $\frac{1}{4}$, $\frac{3}{4}$, $\frac{1}{8}$, $\frac{5}{8}$ $\frac{1}{2}$
- House prices on a road are: £130k, £125k, £140k, £128k, £135k, £980k.
Why might the mean not be helpful? the £980k outlier pulls the mean up

Starter

1. $-6 + (-2) = ?$
2. $\frac{1}{3} + \frac{1}{2} = ?$
3. Median of: 3, 9, 4, 7, 1
4. Mean **and** median of: 5, 8, 3, 12, 7. Which is larger?
5. Five salaries are: £24k, £26k, £25k, £28k, **£97k**. Would you prefer to use the mean or the median to find the average?
6. For $-10, -1, 0, 2, 3$: *estimate* whether the mean is positive or negative. Then calculate both mean and median.
7. Find the mean and median of:
 $-6, -2, 4, -3, 7, 0$
8. What is the median of: $\frac{1}{3}, \frac{3}{4}, \frac{1}{2}, \frac{1}{6}, \frac{2}{3}, \frac{1}{4}$
9. True or False?
 - (a) The median is always one of the values in the dataset.
 - (b) The mean and median are always different.

Starter

1. $-6 + (-2) = -8$ 2. $\frac{1}{3} + \frac{1}{2} = \frac{5}{6}$
3. Median of: 3, 9, 4, 7, 1 4
4. Mean **and** median of: 5, 8, 3, 12, 7. Which is larger? **equal (both 7)**
5. Five salaries are: £24k, £26k, £25k, £28k, **£97k**. Would you prefer to use the mean or the median to find the average? **the median**
6. For $-10, -1, 0, 2, 3$: *estimate* whether the mean is positive or negative. Then calculate both mean and median. **negative: mean -1.2 ; median 0**
7. Find the mean and median of:
 $-6, -2, 4, -3, 7, 0$ **mean 0; median -1**
8. What is the median of: $\frac{1}{3}, \frac{3}{4}, \frac{1}{2}, \frac{1}{6}, \frac{2}{3}, \frac{1}{4}$ **$\frac{5}{12}$**
9. True or False?
(a) The median is always one of the values in the dataset. **False**
(b) The mean and median are always different. **False**
