

IntroducingAveragesStarters: key vocabulary

average		a single value chosen to stand for a whole set of data
dataset		a collection of numbers or information being studied
denominator		the number below the line in a fraction, showing how many equal parts the whole is split into
divide		to split a number into equal parts, or find how many times one number fits inside another.
estimate		a sensible answer worked out quickly from rounded numbers
fraction		a number written as one whole split into equal parts, with a number of those parts taken
mean		the average found by adding all the values and dividing by how many there are
median		the middle value when the data is put in order
negative		below zero; a number or term with a minus sign is below zero.
order		to arrange numbers from smallest to largest, or from largest to smallest.
outlier		a value far away from all the others
positive		a number greater than zero.
sum		the answer when numbers are added together
value		the number that a letter or symbol stands for

Match the word to its meaning

average	a sensible answer worked out quickly from rounded numbers
dataset	a single value chosen to stand for a whole set of data
denominator	to split a number into equal parts, or find how many times one number fits inside another.
divide	a collection of numbers or information being studied
estimate	a number written as one whole split into equal parts, with a number of those parts taken
fraction	the number below the line in a fraction, showing how many equal parts the whole is split into
mean	below zero; a number or term with a minus sign is below zero.
median	a value far away from all the others
negative	the number that a letter or symbol stands for
order	the average found by adding all the values and dividing by how many there are
outlier	to arrange numbers from smallest to largest, or from largest to smallest.
positive	the middle value when the data is put in order
sum	a number greater than zero.
value	the answer when numbers are added together

Match the word to its meaning: answers

average	a sensible answer worked out quickly from rounded numbers
dataset	a single value chosen to stand for a whole set of data
denominator	to split a number into equal parts, or find how many times one number fits inside another.
divide	a collection of numbers or information being studied
estimate	a number written as one whole split into equal parts, with a number of those parts taken
fraction	the number below the line in a fraction, showing how many equal parts the whole is split into
mean	below zero; a number or term with a minus sign is below zero.
median	a value far away from all the others
negative	the number that a letter or symbol stands for
order	the average found by adding all the values and dividing by how many there are
outlier	to arrange numbers from smallest to largest, or from largest to smallest.
positive	the middle value when the data is put in order
sum	a number greater than zero.
value	the answer when numbers are added together
