

PieChartsAndProtractors: key vocabulary

angle	the amount of turn between two straight lines that meet at a point
approximately	close to but not exactly; about.
data	the set of values collected
degree	a unit for measuring angles; 360 of them make one full turn.
formula	a rule written with letters, showing how to work one quantity out from others
fraction	a number written as one whole split into equal parts, with a number of those parts taken
multiply	to add a number to itself a given number of times
pie chart	a circular chart divided into slices to show parts of a whole.
protractor	a tool used to measure angles.
sector	a slice of a circle between two radii
simplest form	a fraction written with the smallest possible numbers above and below the line.
simplify	to write something in its smallest or plainest form without changing its value
sum	the answer when numbers are added together
total	the whole amount found by adding all the parts together.
