

VectorChallengeSheet: key vocabulary

coordinates	a number or pair of numbers that fixes the position of a point.
embedding	a way of turning words into coordinates or vectors so meanings can be compared mathematically
translation	moving every point by the same vector, without turning or resizing it
vector	a quantity with both size and direction

VectorChallengeSheet: key vocabulary

coordinates	a number or pair of numbers that fixes the position of a point.
embedding	a way of turning words into coordinates or vectors so meanings can be compared mathematically
translation	moving every point by the same vector, without turning or resizing it
vector	a quantity with both size and direction

vector	a quantity with both size and direction

Match the word to its meaning

coordinates	moving every point by the same vector, without turning or resizing it
embedding	a quantity with both size and direction
translation	a way of turning words into coordinates or vectors so meanings can be compared mathematically
vector	a number or pair of numbers that fixes the position of a point.

Match the word to its meaning

coordinates	moving every point by the same vector, without turning or resizing it
embedding	a quantity with both size and direction
translation	a way of turning words into coordinates or vectors so meanings can be compared mathematically
vector	a number or pair of numbers that fixes the position of a point.

Match the word to its meaning

coordinates	moving every point by the same vector, without turning or resizing it
embedding	a quantity with both size and direction
translation	a way of turning words into coordinates or vectors so meanings can be compared mathematically
vector	a number or pair of numbers that fixes the position of a point.

Match the word to its meaning

coordinates	moving every point by the same vector, without turning or resizing it
embedding	a quantity with both size and direction
translation	a way of turning words into coordinates or vectors so meanings can be compared mathematically
vector	a number or pair of numbers that fixes the position of a point.

Match the word to its meaning: answers

coordinates		moving every point by the same vector, without turning or resizing it
embedding		a quantity with both size and direction
translation		a way of turning words into coordinates or vectors so meanings can be compared mathematically
vector		a number or pair of numbers that fixes the position of a point.

Match the word to its meaning: answers

coordinates		moving every point by the same vector, without turning or resizing it
embedding		a quantity with both size and direction
translation		a way of turning words into coordinates or vectors so meanings can be compared mathematically
vector		a number or pair of numbers that fixes the position of a point.

Match the word to its meaning: answers

coordinates		moving every point by the same vector, without turning or resizing it
embedding		a quantity with both size and direction
translation		a way of turning words into coordinates or vectors so meanings can be compared mathematically
vector		a number or pair of numbers that fixes the position of a point.

Match the word to its meaning: answers

coordinates		moving every point by the same vector, without turning or resizing it
embedding		a quantity with both size and direction
translation		a way of turning words into coordinates or vectors so meanings can be compared mathematically
vector		a number or pair of numbers that fixes the position of a point.
